Summary

A passionate software engineer with 2.5+ years of experience in Java, Spring Boot driven by a constant hunger to learn and explore new technologies. Alongside this, with 1 year of experience as a DSA/Technical trainer, I have honed my skills in problem-solving, data structures, and algorithm skills while helping others strengthen their coding abilities.

Education

National Institute of Technology, Rourkela
Bachelor of Technology (B.Tech)
CGPA: **7.87**

Odisha, India
July 2018 - June 2022

Experience

Galgotias University — Technical Mentor - Java, Springboot and DSA Greater Noida, India — Jan 2025 - Present

- Trained 300+ students in Data Structures and Algorithms, significantly improving problem-solving skills.
- Mentored 50+ students in developing backend applications using Java and Spring Boot, covering REST APIs, database integration, and best coding practices.
- Contributed to development and enhancement of selected features of the university website, including API integration, form handling, and database optimization.

Chandigarh University — Technical Mentor - Java and DSA Mohali, Punjab, India — April 2024 - Dec 2024

- Trained 200+ B.Tech and M.Tech students in DSA, with a focus on interview preparation.
- Mentored 100+ students through coding exercises, mock interviews, and personalized feedback.

Capgemini — Software Engineer

Pune, India — Sep 2022 - Oct 2023

- Developed and optimized RESTful APIs using Java and Spring Boot, ensuring scalable backend solutions.
 - Worked closely with front-end teams to ensure seamless API integration and smooth end-to-end functionality.
 - Collaborated with senior engineers on code reviews, brainstorming sessions, and performance enhancements.
 - Tools & Tech. used: Java, Eclipse, Postman, SpringBoot, MySQL
-

Skills

Programming Languages: Java, Python, HTML/CSS

Backend Libraries / Frameworks: Spring Boot, FastAPI

AI / LLM: Prompt Engineering, RAG pipeline, Agentic AI, LangChain, LangGraph, MCP (Model Context Protocol), Vector Databases (ChromaDB), LLM API Integration (OpenAI, Gemini, Ollama)

Frontend Libraries / Frameworks: ReactJS

Tools / Platforms: Postman, VS Code, Eclipse, Google colab

Databases: MySQL, MongoDB, PostgreSQL, Chroma DB

DevOps: Docker, Containerization, Render, Git, GitHub

Other: Data Structures and Algorithms (DSA), Kafka, Redis, SOLID principles, Design patterns, Low level design, Multi-threading & Concurrency, Microservices

Personal Projects

Email AI Assistant — [Link](#)

Java, Spring Boot, React.js, Gemini AI

- Developed an AI-driven assistant that automatically generates professional email replies with a single click.
- Built the React.js frontend, integrated a Chrome extension for Gmail automation, extracted email content via API, and generated smart replies using a Spring Boot backend with Gemini AI
- Enabled users to respond to emails in seconds, improving efficiency and reducing response time

Real Time Chat Application — [Link](#)

Java, Springboot, Thymleaf, Web Socket, Javascript

- Built a full-stack real-time chat app using Spring Boot and WebSockets (STOMP) for live, bidirectional messaging.
 - Implemented STOMP messaging over SockJS to ensure compatibility across various browsers and fallback options.
 - Created a responsive frontend with HTML, Bootstrap, and JavaScript for real-time UI updates without page reloads.
-

Achievements

- Solved 700+ DSA problems each on LeetCode and GeeksforGeeks, strengthening algorithmic thinking and coding proficiency.
- Achieved Monthly Badge awards for consistent daily problem-solving on LeetCode for three consecutive months.
